Product description

The intelligent Fireplace is a close control Fireplace based on blue tooth 4.2 technology with low power consumption, which can be controlled through the Fireplace APP on the mobile phone.

App soft name: Fireplace Empire

1 Fireplace Installation and unloading

1.1 Application requirements

System version: iOS 7.0, android 4.4 or above.

Bluetooth version: blue tooth 4.2 or above low-power blue tooth mobile phone.

1.2 Fireplace download and installation

Scan the following QR code to download and install IOS Version or Android Version

2 Instructions for connection operation

2.1 Mobile phone connection operation

1) Login: Search the app soft for "Fireplace Empire" in the Apple Store or Google Store,download and install the "Fireplace Empire" on the mobile phone, and click the icon to log in;

2) Add: on the screen of Fireplace list, click the add icon in the upper right corner of the screen to enter the device add page;

3) Search: on the Add device page, click the search icon at the bottom of the screen to find the device

4) Connection: after the device is found, click to connect and enter the home page to display "Connected";

5) Disconnection: if the connection is beyond the blue tooth transmission range, the connection will break, and the "dis-connection" will be displayed;

6) Callback: the mobile APP that has been matched with the fireplace will automatically connect to the fireplace when it returns to the bluetooth transmission range;

7) Deletion: in the Fireplace list page, the deletion box will pop up after a long press. Select "DELETE" to DELETE the connection.

3 Function instructions

3.1 Debugging temperature

1) Turn up the temperature: click Temp in the menu at the bottom of the APP, enter the temperature control interface, and drag the cursor from 5-32 to increase the temperature setting, with the highest adjustable to 32° c; of the screen to enter the device add page;

2) Lower the temperature: click Temp in the menu at the bottom of the APP, enter the temperature control interface, and drag the cursor from 5-32 to lower the temperature setting, with the lowest adjustable to 5 ° c;

Note: when the debugging temperature is higher than the indoor temperature, the meter appliance will "click" and the heating wire will start to work. When the debugging temperature is lower than the indoor temperature, the meter appliance will not ring, the heating wire does not work;

3) Picture:

3.3 Fire gear

1) HEAT LOW: click Temp in the menu at the bottom of the APP, enter the temperature page, click "Slow mode" to switch to LOW level, and a flame icon will be displayed on the screen to HEAT by small fire ;

2) HEAT HIGH: click Temp in the menu at the bottom of the APP, enter the temperature page, click "Fast mode" to switch to HIGH level, and two flame icons will be displayed on the screen to HEAT by heavy fire ;

3) Picture:

3.2 Adjust the brightness and color of LED light in the fireplace

1) Brightness: click "Color" in the menu below the APP, enter "LED light", and drag the cursor from 0-100, the larger the value, the brighter the brightness;

2) Dimming: click "Color" in the menu below the APP, enter "LED light", and drag the cursor from 0-100. The smaller the value, the darker the brightness;

3) Picture:

4) Color selection: in the color table of the circle, click a color or drag the cursor in the color table of the circle to select the color

5) Save color: after selecting a color, select one of the following five DIY items and hold it for a long time until it turns into the color of your choice

 - B) Apple adds songs by:
 1. Confirm that Itunes is installed on the computer and apple has installed its own music software on the iphone
 2. Connect your phone to your computer and open the Itunes program on your computer
 3. Use Itunes to drag or sync songs to your phone
 4. After adding the songs to the music software of the apple system, you can directly add the good music in the bottom right corner of the FirePlace APP
 5. Picture:
- 3) While the music is playing, the LED lights change with the rhythm of the music
- 4) Picture:

4 Attentions

- In order to ensure the good condition of the product and use safety, please follow the instructions and reminders on this manual. Careful operation, please read safety precautions in detail:
1. The load connected to the fireplace power panel shall not exceed the rated power.
 2. When the power is out at home, there will be an inaccurate situation on "Timing", so it is necessary to reconnect the mobile phone to calibrate the time.
 3. When installing the antenna of the bluetooth smart fireplace, the antenna cannot be too close to the main control panel because the antenna will be affected by the main control panel, so the antenna can be attached to the shell of the fireplace.
- As shown in the figure below:
